

Deivison Alves Justiniano

Personal declaration

Single, non-smoker, 40 years old, with 20 years of experience in vertical activities in which I developed my professional career. I have a degree in Private Security Management.

Initially working with mountaineering in Brazil, I migrated to rope access and nowadays I work as a Blade Repair Technician.

Management and leadership skills

With extensive experience in training, leadership of work teams and rescue at heights, I trained several teams for access to structures, rope access and coordinated the Emergency Brigade at the Cambambe and Laúca hydroelectric plants in Angola. During this period, I had the opportunity to train and work with Portuguese firefighters and paramedics in rescue situations at heights, confined spaces and remote areas; These activities give me versatility in the field.

I have been developing my activities in Europe since 2019. I had the opportunity to prepare Tecniquitel's training center in an IRATA and GWO accredited training center.

In 2022 I had worked on repairing wind turbine blades for Nordex in France and I'm currently working on Vestas projects in Scandinavia.
