Professional Profile:

A highly motivated, confident, hard-working, extremely safety-conscious and technically competent professional with over 20 years experience across a variety of industries including shipbuilding, ship repair, Oil & Gas and renewable energy sectors. Having strong communication skills, I can interact across all levels. With high attention to detail, I have an exceptional ability to read and interpret engineering drawings. I hold formal qualifications and a wide knowledge of complex engineering systems (mechanical, electrical and hydraulic etc). I am a driven individual with significant experience of solving complex production problems and issues, identifying and implementing improvements to increase efficiency. Willing to work in any location, having no domestic issues. I keep my skills and qualifications updated as an aid to both my personal and professional development. Since 2015 I have been working as private Ltd company.
