Profile

Previous mechanic/mechanical fitter With many skills from previous roles under my belt, I am currently challenging myself by changing my career and looking for work as a qualified Blade Repair Technician or a Wind turbine maintenance technician. I work incredibly well in a team or on my own while always making sure quality, safety of myself and others as well as attention to detail are my top priority in any work I take part in. I possess great amounts of leadership skills and work well under pressure making me a brilliant choice for recruiters or employers as I can adapt to my surroundings with ease I am available for mobilization on or offshore with all my Certifications completed and in date.
