- 

## Work Experience

---

**Engineering fitting apprentice**  
AR controls

September 2019- September 2021

- Working on large scale projects in the automotive sector for clients such as Nissan Sunderland , Envision , Unipres and Faltec Europe maintaining and installing electromechanical systems such as robot cells and automated guided vehicle systems . Whilst being at Sunderland engineering training association working towards Level 3 NVQ in installation and Commissioning. Throughout the job I gained experience in Electrical and mechanical installation and maintenance.

**Install Engineer**  
A&P air conditioning

September 2021- December 2023

- Due to lack of work coming in at AR controls I was advised to move companies in order to finish my apprenticeship. I moved to A&P air con where I worked as part of a team installing HVAC Systems on new builds around the UK for construction companies such as Sir Robert McAlpine , Esh Construction and Kier . Throughout the job I gained experience in installing copper pipe work using bending equipment and brazing equipment (1/4" to 1&1/5") , installing drainage systems using plastic tube. Assisting with the commissioning and handing over process of the Systems to the client.

**Rope Access technician**  
CAN LTD

January 2021- January 2021

- I joined Can for a small project down London proving building maintenance services for a waste plant site using Rope Access techniques under the Level 3s supervision . The Client requested multiple signs to be cleaned and multiple to have the paint scraped off and repainting . All of which could be done by securing the ropes to a secure structure on the roof and abseiling down.

**Rope Access Technician**  
SEP Culant

Februaury 2024 - April 2024

- I joined SEP Culant on a contractor basis assisting with there large QTS contract in providing Rope Access services for the UKs railway , the job entailed of mostly De Veg work on bridges and and wingwalls. There was also a lot of work assisting railway surveyors where the the access was restricted and ropes were required .

**Rope Access Technician**  
AIC LTD

May 2024 - June 2024

- Working at AIC i was working as part of a team of around 20 painters on the Seah Wind factory in Teesside , touching up paintwork in the steels to provide an Anti- Corrosion protection to provide longevity of the steelwork.

- I joined GDi to work on an offshore project for Klinger Integrity Services on the ALBA NP and ALBA FSU , Hot bolting on a range of flanges with bolt sizes from 5/16” to 1”. Using Rope Access where required , gaining all relevant permits and carrying out toolbox talks before starting any new tasks. Tensioning bolts to the corrects standard provided in the Job pack.
