Commercial Ventilation Engineer at SITIE GULF QATAR, Doha, Qatar

January 2018 — January 2020

Main task was the installation of the ventilation system. That included multiple team coordination on a daily basis, constant safety adherence for my team, communication between all of the involved work groups in our sector, and with the project manager.

About me

A strong electrical background, and a lifetime of daily use of tools in my family company, have provided me a good base for the completion of most professional tasks that I encounter. Combined with my rope access experience, inspection diligence and good work ethic, I also bring safe and efficient operations.

My precise solutions, hazard identification, and adherence to standards have contributed to all the projects I have been a part of.
