WORK EXPERIENCE

Rope access technician service team

2023/12/20

Fortuna International LTD

Ship servicing: Maintenance and repair of various systems and equipment on the vessel to ensure its normal operation.

Painting with painting machines: Using specialized machines or equipment to apply paint or coating materials to the surface of the vessel for protection and exterior renewal.

High-pressure washing: Using high-pressure machines for a water jet to clean the vessel's surfaces from dirt, contaminants, and other residues.

High-altitude work using alpinist equipment: Performing tasks at height on the ship using specialized alpinist equipment for access and execution of various tasks.

Rope access technician for insulation

2019/10/01-2023/12/20

Krakow,Poland FREELANCE

I was responsible for washing glass facades using high-pressure machines, insulating glass facades using hydraulic systems, replacing lighting, replacing rainwater systems, and inspecting glass insulation. My duties included ensuring that the tasks were completed efficiently and accurately, maintaining the integrity of the glass structures, and addressing any issues that arose during the process.

Rope access technician

2016/03/01-2019/09/28

Kherson,Ukraine EXPERT FASAD

"I was a rope access technician for insulation. My work involved using specialized equipment and climbing techniques to access hard-to-reach areas. I specialized in performing insulation work on various objects such as buildings or pipelines to ensure effective heat or sound retention."

Rope access technician

My duties included ensuring that the tasks were completed efficiently and accurately, maintaining the integrity of the glass structures, and addressing any issues that arose during the process.

Rope access technician

2009/02/20-2015/01/13

Kyiv,Ukraine Ayger

I was involved in insulating facades, installing metal structures, painting structures, and insulating structures. Various techniques and materials were used in my work to ensure efficiency and quality. I was responsible for completing tasks from start to finish, including surface preparation, installation of materials, and applying protective coatings such as paint or other sealants. My goal was to ensure the durability and effectiveness of the treated structures.
